From Editors

Dear Children,

Hello! Summer vacation is coming! What's your plan? No matter what your plan is, don't forget having fun with English! When you walk, eat or go shopping, look around! You will see English everywhere! Now, let's share some of your writing here!

Love,

Miss Eunice Choi

Miss Fiona Tsang

Miss Sharon Wong

Miss Carmen Ching

Let's Read

What do you want to be when you grow up

by Sam Andrea 6A

I want to be a scientist when I grow up because it is an interesting and exciting job. If I become a scientist, I will study Science and Maths to look for new ideas to invent some new things.

Scientists need to be clever so that they can use Maths theory to make some new and useful things. Scientists also need to be hard-working so that they can keep on inventing new things.

I think this job is not suitable for me because I am weak in making new and useful things. I am only good at arts. I am not good at Maths or Science.

I really want to be a scientist. From now on, I will practice every day to improve my Maths. I need to be hard-working and get good results in examinations. I think I can do this job.

A Thank You Letter To My Teacher

by Chan Tsz Him Edward 6B

Dear Miss Kan,

I would like to thank you for your patience and kindness. You always help me solve problems at school. I really admire you. You teach students patiently.

I like your lessons very much. I gained a lot in your lessons. I love music. If I don't understand anything in the lesson, you teach me how to tackle the difficulties.

You are a helpful teacher. You always help the students solve problems. I remembered once I was in the music exam, you encouraged me to try my best.

I will work hard and do my best in the future. I wish you have a good health.

Love,
Edward Chan

What do you want to be when you grow up? by Tai Sing Yee Doris 6C

I want to be a lawyer when I grow up because it is a challenging and meaningful job. I will help people fight for their right in the court and give meaningful advice to them.

Lawyers need to be knowledgeable. They need to memorize a lot about laws so that they can argue in the court with good reasons. Lawyers need to be hard-working, too. When they handle the case, they need to search for useful information. People need meaningful advice so lawyers should be well-organized.

I think this job is very suitable for me. I am outgoing. At recess, I love talking to my friends and playing with them. I can interview people naturally. I can't be a lawyer unless I am a confident person. If I am shy, I can't think of good points in the court. I wish I will be a lawyer some day.

I want to be a lawyer very much. I will study hard. I will also read books about the law so that I can know more about it. I have a bit shy so I will try to speak clearly and loudly. I want to be braver. I am sure that I can be a successful lawyer when I grow up.

LAWYER**

What do you want to be when you grow up?

by Chan Tsz Wa Steve 6C

I want to be a scientist when I grow up because it is a challenging and interesting job. If I become a scientist, I will discover new things around us and invent new things to help people.

Scientists need to be intelligent so that they can find new ways to solve problems. Scientists need to be creative too, so that they can invent or discover something that is unexpected. Scientists need to be calm so that they can work under pressure.

I think being a scientist is suitable for me because I am smart and calm. I am good at Maths and I get good results in the exam. I am also calm. When something unexpected happens, I always response to it naturally. I also like to do experiments. I hope I can be a scientist some day.

I really want to be a scientist. From now on, I will study hard and read books about Science so that I can know more about it. I need to work hard to go to the university, too. I will be a scientist when I grow up.

A Letter To My Teacher

by Cheung Hau Yan Angela 6B

Dear Mr Wong,

I would like to thank you for your patience and kindness. You are one of the best teachers in our school. I like you very much. You always smile happily. You always teach me how to play basketball well.

I enjoyed your teaching very much. You taught me how shot and dribble the basketball. You taught me with a funny gesture. You are patient, so we always win in the competition. I remembered I won the competition with the team members and you. I felt excited.

I never forgot what we did in our school. I will study hard. And I will keep on playing basketball in secondary school.

Keep in touch. Miss YOU!

*Love,
Angela*

My Missing Cake?

by Lo Sum In Alisia 6A

One day, I brought a cake to school. In the afternoon, the cake disappeared. All of my classmates said, "We did not eat your cake!" So I asked my teachers for help.

My teachers taught me what we should do. First, we checked all of our mouths to see if there was any cream mark. Also, we checked our bags if there was my cake in them. However, we could not find any signs. Then, we tried to trace back the place where I used to store my cake. Suddenly, we found some dog's claw marks on the floor. We followed the marks and found a dog in the small playground.

At last, we knew that the crime was done by a dog because there was some cream on its mouth. Case closed.

Water Pollution in Hong Kong

by Wong Ka Hei Katie 6D

In recent years, water pollution in Hong Kong becomes more and more serious.

Like other large cities in the world, there are many causes of water pollution in Hong Kong. They are factories and people.

First of all, factories put chemicals into the water. When factories start to work, they produce a lot of chemicals and smoke. Factories pour chemicals into the rivers and the sea, therefore, fish will die because of the chemicals. If we eat the fish, we will get sick easily.

Secondly, people throw away rubbish into the river and the sea after they have a barbecue or picnic. As a result, the water is getting dirtier. Sea animals will die especially the Chinese White Dolphins and the endangered animals in Hong Kong. They may extinct if we keep on polluting the water.

Lastly, people always take a bath instead of taking a shower. They always produce excessive water use. They waste a lot of water and the sea will be polluted by dirty water.

In order to solve water pollution, Hong Kong Government and the citizens ought to work together. The government ought to fine people who throw rubbish into the water. Moreover, the government ought to set up laws for stopping people from wasting water. Factories can recycle or reuse waste water.

To stop water pollution and make Hong Kong a better place to live, everyone should try their best to do their part because everyone has its own responsibility. Therefore, everyone should work together to solve the water pollution problems.

The Enormous Crocodile Clever Trick Number 5

by Wong Cheuk Wan Amy 6C

The EC was back. He was black and brown. He lost one leg and his tail was burnt. He was angry and hungry. Therefore, he wanted to catch and eat eight fat children.

EC decided to catch children in Fun Fun Book Shop. When he arrived there, he saw many children who were reading books quietly. He wanted to catch and eat Peter and Bobby because they were fat.

EC made himself look like a book shelf. Soon, Peter and Bobby wanted to take the books and walked closer to EC. The shopkeeper ran and stopped it. He caught EC with a piece of string. EC was angry that he could not eat Peter and Bobby. He shouted loudly, "I am very hungry!" But it was meaningless. The shopkeeper called the police finally.

The police came and sent EC to the HK Wetland Park. Finally EC gave up eating children and he became the most popular animal there. He enjoyed his new life.
